

- **Practical Software Engineering graduate with experience in full-stack software design and development**
- **Experienced in writing clean, efficient code, client-side & server-side development, and OOP principles**
- **Develop web applications, integrate with databases, optimize backend performance, ensure high-quality UI**
- **Strong technological and analytical thinker, result-driven with a can-do approach, customer-oriented, leadership abilities and excellent communication skills**

Tools & Technologies:

- ☑ **Server-side:** C, C# .NET Core, Node.js, Java, Python, C++
- ☑ **Client-side:** Angular, React, TypeScript
- ☑ **Version Control:** GitHub
- ☑ **Databases:** SQL Server, MongoDB
- ☑ **Cloud Environment:** AWS

Professional Experience:

2025- Present: **Software Developer Intern, DiversiTech Technology**

- **Develop end-to-end full-stack applications**, covering frontend, backend and integration layers
- **Receive requirements**, plan, design and build Web system within timelines and target frameworks
- **Work in Agile environment** with cross-functional teams, daily standups and continuous integration
- **Create system documentation**- architecture diagrams, API reference, integration flows & user guide
- **Implement responsive UI components**, user flows & data connections across client and server sides
- **Build backend services**, manage APIs & handle integration between public and management systems
- **Write clean code** using React, Next.js & Node.js, ensuring functionality, scalability & maintainability
- **Apply OOP principles, follow best practices**, and perform debugging, testing and QA
- ✓ **Selected to prepare & deliver official client presentation**, deliver live demo & lead training session

Education:

2023-2025: **Practical Software Engineering**, MAHAT, The Government Institute for Training in Technology & Science

- **Develop full-stack** bartering platform from scratch, enabling users to register & exchange services
- **Develop responsive application using React & C#**, supporting desktop, mobile & app interface
- **Deliver full product lifecycle** from design to deployment, ensuring functionality, usability & scalability
- **Connect databases to application services**, enabling seamless data flow & real-time access
- **Design intuitive UI/UX** while optimizing backend performance for efficient, reliable response
- **Apply OOP principles**, write clean & efficient code, and build scalable services architecture
- ✓ **Successfully completed** an advanced Code-Ultra program by KamaTech, with focus on Data Structures, Algorithms, Advanced Mathematics, Digital Systems, Operating Systems & Networks
- ✓ **Completed studies with a high-grade point average**
